Front End Web Developer – Mondo Marketing
May 2021 – August 2021 | Hybrid Remote

- Created responsive websites for clients including e-commerce.
- Worked with various technologies suchs as HTML, CSS, JavaScript, Wordpress and Shopify.
- Worked on PPC social media campaigns on Facebook and Instagram for clients.
- In direct communication with clients daily.

PERSONAL PROJECTS

SamiCord – REACT, Firebase, Google Authentication

- A web application created to replicate the interface of Discord. I created this application to put in practice the use of Reach and Firebase.

SuperChat – REACT, Firebase, Google Authentication

- A live chat room built using REACT. The application uses Firebase for storage of messages and backend communication. Also uses Google authentication for logging in and out of the application.

My Todo – REACT

- A simple To Do list application I created using React. I use this application daily as a simple way to keep track of tasks to be done.
